

How to start

Boot up the game using the python program, don't mess with the code and everything should work (kinda)

You will be taken to the "start" screen, press any button to begin the game

PLaying the game

Use the arrow keys to move left and right, and the spacebar to shoot lasers at the enemies watch out for enemy bombs as they each take away 1 point of your shield, obtain the shield powerup to restore your shield

as you keep going you will find harder formations of enemies and eventually a boss, the bosses have a lot more resistance than enemies

End of the game and restarting

once you get to completing level 10 you will enter the victory screen

press Esc to exit the game (you can also do this at any point of the game)

or press r to restart the game, it will take you back to the start screen.
